PROFESSIONAL SUMMARY

Software engineer with expertise in designing scalable, high-performance cloud solutions and automation. Strong hands-on experience in multi-cloud environments, DevOps, and full-stack development with Python, Java, and JavaScript.

PROFESSIONAL EXPERIENCE

PwC - Advisory, Cloud Engineering Practice, Milan, Italy

October 2024 – Present

Cloud Architect / Software Engineer

- Designed, built, and deployed production-grade cloud-native applications using a microservices architecture on AWS (ECS, EKS) and Kubernetes, supporting a PIPL-compliant localized after-sales platform for a global luxury fashion client in China; restored full end-to-end operations for 400+ customer advisors after a regulatory-driven data transfer shutdown and enabled the migration of historical repair data, reactivating engagement for ~180,000 customers.
- Automated CI/CD pipelines using GitHub Actions and Azure DevOps to build, version, and deploy Java/Maven applications, improving reliability, repeatability, and reducing release time by 65% (from ~15 minutes to ~5 minutes).
- Defined and implemented a DevOps / platform target architecture aligned with SAFe, integrating CI/CD, automated testing, Infrastructure as Code (Terraform), and observability/monitoring; delivered hands-on proofs of concept that accelerated cloud adoption and governance standardization for a large logistics client in the Middle East.
- Applied FinOps and DevOps best practices across multi-cloud environments to reduce operational costs and deployment lead time through infrastructure optimization and monitoring improvements.
- Active member of an internal GitHub Heroes community, promoting best practices for repository lifecycle management, GitHub Actions CI/CD pipelines, and secrets management; analyzed 500+ automated security alerts for exposed secrets in source control and coordinated remediation to prevent credential leakage.

Northeastern University - Department of Biology, Boston, MA

January 2023 – February 2024

Technology Consultant

- Created a comprehensive dashboard for visualizing form submission data, offering actionable insights and supporting data-driven decision-making within the department.
- Enhanced department efficiency and productivity by 80% by optimizing the form submission process with Smartsheet, incorporating streamlined workflows and automations for improved operations.
- Engineered user-centric forms, focusing on intuitive design and logic to elevate the user experience in academic settings, supporting the department's digital transformation.

CERTIFICATIONS

AWS Solutions Architect - Associate, HashiCorp Certified: Terraform Associate (004), Salesforce MuleSoft Developer, SAFe 6 Agilist.

EDUCATION

Northeastern University, Boston, MA

September 2021 – May 2024

Master of Science in Computer Science; GPA: 4.00 / 4.00

Activities: NEU Blockchain Club, Graduate Fintech Initiative, Competitive Programming Club, CodePath, Hack Boston.

Relevant Coursework: Object-Oriented Design, Data Structures and Algorithms, Building Scalable Distributed Systems, Web Development, Machine Learning, Database Management Systems, Computer Networking, Computer Graphics.

Minnesota State University - Mankato (AACSB Accredited), Mankato, MN

January 2015 – May 2019

Bachelor of Science in Marketing and Certificate in Business Analytics; GPA: 3.99 / 4.00

RELEVANT PROJECTS [\[many more\]](#)

AWS Full-Stack DevOps IaC [\[link to project description, reach out for access to GitHub repo\]](#)

July 2024

- Developed a responsive web UI with ReactJS including text and file input fields.
- Implemented file upload to S3, file paths storage in DynamoDB, and automated EC2 instances creation via Lambda.
- Followed AWS best practices, used Cognito as API-Gateway authorizer, and created triggers to execute bash code.
- Utilized AWS CDK (TypeScript), CloudFormation, and SDK JavaScript V3 for infrastructure as code management.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Bash, YAML, HCL, SQL, C/C++, HTML/CSS.

Tools & Frameworks: DevOps, CI/CD, AWS/Azure/GCP, Docker/Kubernetes, Terraform, Ansible, NodeJS, ReactJS.

Databases: MySQL (SQL), MongoDB (NoSQL), DynamoDB (NoSQL).
